

Md. Abdullah Al Jaber

Email: jaber15-4458@diu.edu.bd

Phone: +8801777848795

Location: Commerce College, Mirpur-2, Dhaka

Professional Summary

Motivated and detail-oriented Computer Science Engineer with a strong foundation in Machine Learning & AI, Frontend Development, and Data Analysis. Experienced in building predictive models, developing responsive web applications, and creating data-driven insights using Power BI and Excel. Skilled in combining technical innovation with analytical thinking to deliver impactful academic and practical solutions. Passionate about applying AI, data, and visualization tools to solve real-world problems and support decision-making.

Core Skills

- Machine Learning & AI – Model development, NLP, Computer Vision, Deep Learning
- Data Analysis & Visualization – Power BI, Excel, Data Cleaning, Interactive Dashboards
- Web Development – HTML5, CSS3, JavaScript, React, Bootstrap
- Programming & Tools – Python, SQL, GitHub, Flask
- Other Tools – Word, PowerPoint, VS Code, Jupyter Notebook
- Soft Skills – Problem-solving, Communication, Team Collaboration, Continuous Learning

Education

- Daffodil International University | 2021 – 2025

Bachelor of Science in Computer Science & Engineering (BSc in CSE)

- CGPA: Above 3.25

- Gov't BM College | 2020

Higher Secondary Certificate (HSC) – GPA 5.00/5.00

- Jhalakathi NS Kamil Madrasah | 2018

Secondary School Certificate (SSC) – GPA 4.94/5.00

Technical Skills

- Programming & Frameworks: Python, C, JavaScript, React
- ML/AI Tools: TensorFlow, Keras, Scikit-learn, PyTorch, Pandas, NumPy, OpenCV
- Data Visualization: Power BI, Excel, Matplotlib, Seaborn
- Web Technologies: HTML5, CSS3, Bootstrap
- Database Management: SQL Query
- Version Control: Git, GitHub

Projects & Research

- Fetal Health Prediction (ML Project)

Developed machine learning models to predict fetal health conditions based on sensor data. Used Scikit-learn and TensorFlow for classification and model evaluation.

- Image Classification (Computer Vision Project)

Implemented a CNN-based image classifier using TensorFlow and Keras for object detection and recognition tasks.

- NLP Sentiment Analysis with Hugging Face And Flask

Designed and deployed a text classification model for sentiment analysis using Python and deploy in hugging face and another project is deployed in flask.

- OCR-Based Image-to-Text Extraction (Computer Vision & NLP Project)

Developed an OCR system to extract text from scanned images using Tesseract and OpenCV. Processed image data, improved text accuracy through preprocessing, and automated text conversion for document analysis.

- Student Management System (Frontend Project)

Created a React-based system for managing student data and analytics. Implemented responsive design and user-friendly interfaces.

- Portfolio Website

Built a responsive personal portfolio website using React, HTML5, CSS3, and Bootstrap to showcase projects and skills.

- Sunrise Hotel Website

Developed a hotel booking and information website using HTML, CSS, and JavaScript (React). Focused on clean design and smooth navigation.

- Engineering Project (Shopping Page)

Created a CRUD-based shopping site using HTML, CSS, JavaScript, and PHP. Demonstrated product listing, cart, and checkout functionalities.

- Fire Extinguisher Robot (IoT & Embedded Systems)

Built an automated fire detection and extinguishing system using flame sensors and Arduino. Collected environmental data for analysis and IoT integration.

- Power BI Sales Dashboard (Practice Project)

Developed interactive dashboards for sales and performance analysis using Power BI. Trends, and product insights to improve data-driven decision-making.

Research Interests

- Machine Learning & Deep Learning
- Natural Language Processing (NLP)
- Computer Vision & Image Processing
- Data Science and Predictive Analytics

Competitions & Activities

- Participated in National and University-level Data Science & ML Competitions.
- Achieved 2nd place in a university-wide Data Science contest.
- Engaged in Kaggle competitions on data preprocessing, feature engineering, and predictive modeling.
- Conducted peer mentoring sessions on Python, ML, and research basics.

Leadership & Extracurricular Activities

- Leadership & Collaboration: Led multiple academic and tech projects.
- Sports: Skilled in cricket and football.

Languages

- English – Academic Proficiency
- Bangla – Native
